

Joining Tavcom Training was exactly what I was looking for in an industry I have experience of, having worked for both ADT and with Chubb Fire previously.

Tavcom is an absolute dream to work for. They have a very laid-back policy to account management as it's more of a consultative role where we can talk to the clients to come up with the perfect solution for them. It's a fantastic industry and you get a real sense of achievement seeing the clients grow and use the skills that they have been taught to great effect. They are more like friends than customers, and pretty much everything is on a first-name basis.

I hope that I will still be with Tavcom for our fiftieth anniversary, however I will be 80!
