

# TAVCOM TRAINING

*A Dedicated Security Training & Advisory Company*

## FOUNDATION CCTV - C1

### Course Information

This two day course has been developed to provide individuals and companies with the necessary fundamental skills in Closed Circuit Television sales, system design, applications, installation, commissioning and operation.

#### 1. Aims of the course.

To equip the experienced and non-specialists with a sound understanding of the following topics:-

- |                  |                |                           |
|------------------|----------------|---------------------------|
| * Monitors       | * Lenses       | * Cameras                 |
| * Site surveying | * Lighting     | * Operational Requirement |
| * Cables         | * Multiplexers | * Recording principles    |
| * Switchers      | * Standards    | * Test equipment          |

#### 2. Who should attend?

The careful preparation and nature of this training programme benefits specifiers, consultants, sales personnel and installation engineers alike.

#### 3. Hands on training.

A wide selection of up to date equipment is available for delegates to hone their skills.

#### 4. Specialist qualified tutors.

Tavcom Training has selected tutors who operate independently in their specialist fields and are called upon to teach and demonstrate the very latest technology.

#### 5. Independent Training.

Whilst Tavcom thank manufacturers for their continuous support in helping us to raise standards within our industry by supplying the latest equipment, our courses are totally independent of any sales orientation.
